- 20mm LCD with backlight
- Stainless steel shackle and hook
- Zero mode
- Tare function
- Hold mode
- Overload alarm
- 1 year Marsden warranty

What is the OCS-L?

The Marsden OCS-L is a lightweight, battery powered hanging/crane scale for simple suspension weighing. With a range of capacities available.

Crane scales such as the OCS-L are commonly used in food production plants and markets to weigh items such as fish and vegetables. This is a great digital alternative to dial scales.

Clear and easy to read

Due to the varied environments where the OCS-L can be used, the device has been designed to have a 20mm LCD display which means it is easily visible.

Whether you are working in a dark factory or on a market stall during the gloomy winter months, you are going to be able to see the screen on the OCS-L easily and quickly without issue.

Lightweight device

At only 0.7kg, the OCS-L is the lightest crane scale in our collection. This makes the device ideal for conveniently transporting and manoeuvring into position.

We have found the OCS-L to be highly popular with market stall traders as the scale is small enough to conveniently fit into a box, whilst being highly accurate and incredibly easy to operate.
